

HDMI KMJ COUPLER

High Definition Multimedia Interface Feed-Thru Coupler

OCC is pleased to announce the addition of a HDMI (High Definition Multimedia Interface) Feed-Thru coupler to our KMJ Keystone Adapter product line.

HDMI technology has become the de facto standard for interconnecting HD equipment. HDMI transmits uncompressed, high-definition digital video, multi-channel surround audio, and advanced control data through a single cable. The HDMI KMJ Coupler provides the capability to create a custom high definition interconnect solution between a digital AV source and display. The coupler easily snaps into any OCC KMJ faceplate and is ideal for commercial or residential applications such as conference rooms, classrooms, or media rooms.

* Typical A/V Interconnect Application

Features & Benefits:

- Supports 10.2Gbps, 720p, 1080i, 1080p, 4k x 2k, Deep Color, 3D
- HDMI Ethernet with Audio Return Channel, CEC, and HDCP
