

# Increase the power of your cellular network for those hard-to- reach places.

**If your office or facility has areas where cellular reception is unpredictable, it can put you in a bad spot.**

OCC's patented Cellular Distribution System (CDS) redistributes cell signal to previously unreliable areas of your building. It's a complete solution that's easy to install without the expense of a contractor or major construction. And with no monthly fees, CDS is much less expensive than most alternatives.

**Make the call for a simple, cost-effective solution to your cell phone disconnects.**

See OCC at BICSI in  
Tampa, FL **Booth #410**

## **APPLICATIONS:**

- Manufacturing buildings
- Office facilities
- Retail stores
- Metal building structures
- Campus dorms
- Building basements and below-surface structures
