

The documents in Section 1 are required for all OCC warranties. Section 2 are contains supplemental documents that OCC or the end user can request to confirm any OCC system solution or warranty.

### Required to Process Warranty

### Section 1

- ☐ **Project Registration Form# 223**  
The project registration form must be completed and submitted to OCC. Please complete and submit to OCC for approval, prior to offering an end user an OCC extended warranty.
- ☐ **Test Data**  
Furnish all test data per the ANSI/TIA-1152, Requirements For Field Test Instruments and Measurements For Balanced Twisted Pair Cabling, and TIA Telecommunications System Bulletin TSB-140, Additional Guidelines for Field-Testing Length, Loss and Polarity of Optical Fiber Cabling Systems for field-testing of fiber optic cabling systems. Test results should be sent as raw data **only** from the tester (pdf, word, excel etc...are **not** acceptable formats).  
**Note: The Link must be defined. Documentation in the project file must show where connected between specific points, not including patch cords.**

*\*If the file is too large to send, please contact your OCC Representative and we can connect you with a link to upload your files online\**

### Supporting Documents – Optional / On Demand by OCC or Customer

### Section 2

- ☐ **Project description and / or Material list** - The list may include jacks, cabinets, cables, patch panels, fiber optic enclosures, adapters, cassettes, patch cables, outlets, cable management and premise equipment that are used to support the MDIS permanent Link, Channel Warranty and Fiber Warranty.
- ☐ **Calibration Certificate (if not included on the test results)**  
Please include a copy of the calibration certificate of the machine that provided the test results turned in. This should include the tester manufacturer, model number and date test instrument was last certified, version used in the testing, the testing technician's name, and NVP setup criteria used.
- ☐ **Site Audit**  
OCC may request a site visit if any questions regarding the accuracy of test data or installation arise.
